Hello! I am the fiancée of a truck driver. My fiancée "David" delivers a lot of Medical Supplies to warehouses' who distribute them to Hospitals all across America. He only has an allotted amount of time to deliver these supplies to the customer, and if he's held up in traffic the customer gets upset cause their supplies go out on a daily basis and they don't have them to send if he has not delivered them yet. Now when we need Medical attention we get upset if we are held up in traffic jams, if we knew the route we were on was held up we, would use another route....cause in a medical emergency these are life and death situations. XM Radio is just as important to truck drivers to deliver the freight they are hauling no matter what it may be. I know that David uses this station all time in big cities that usually has a lot of traffic jams and by listening he can avoid most of them and get his freight where it needs to be when it needs to be there. SO PLEASE REMEMBER WHEN YOU VOTE ON THIS VERY IMPORTANT DECISION HOW YOUR VOTE AFFECTS ALL OF US ACROSS AMERICA. REMEMBER TRUCKS MOVE THIS COUNTRY. AND "IF YOU GOT IT A TRUCK DRIVER BROUGHT IT" Thank you, sincerely, Linda Hess
